Talking Points

- ***SNOMED CT International Nursing Working Group***
- Ways to collaborate
 - Nursing Working Group
 - Collaborative Space
 - SNOMED CT International Nursing Content Education

SNOMED Nursing Working Group

- Domain specific working group charged by the SNOMED International Editorial Board
 - creation of the principles and processes necessary for working with nursing terminology developers to enhance nursing terminology content within SNOMED CT
- Composed of nurses representing ANA, RCN, and clinical practice. Open to all

The SNOMED Nursing Working Group Coordinates Nursing Content

Koordinerer sygeplejefagligt indhold

- Review of existing nursing content
- Assures that adequate content exists to support nursing practice
- Identifies and prioritize new nursing content for inclusion in SNOMED CT
- Develops partnerships and relationships with vendors or other specialty organizations
- Provides guidance about the use of SNOMED CT in nursing practice

Nursing Working Group Milestones

- American Nursing Association (ANA) recognized nursing classifications integration within SNOMED CT
 - Nursing Diagnosis concepts integration January 2002
 - Nursing Interventions concepts integration January 2003
 - Perioperative Nursing DataSet concepts integration July 2003
 - Nursing Outcomes concepts integration January 2004
 - Clinical Care Classification concepts integration July 2005
 - Omaha System concepts integration July 2005
- International Classification of Nursing Procedures (ICNP) Collaboration Update

Nursing Working Group

- Concepts from the nursing domain are appropriately modeled
- Mappings between existing nursing terminologies and SNOMED CT are valid and reliable
- Efforts inform and are informed by other activities related to a system of concepts for nursing

Recent Nursing Working Group Projects

- Education and counseling
 - Recommendation to

- Assessment tools
 - How to define the procedure of “doing the assessment”

- OrderSets

- SubSets

Talking Points

- SNOMED CT International Nursing Working Group
- *Ways to collaborate*
 - *Nursing Working Group*
 - *Collaborative Space*
 - *SNOMED CT International Nursing Content Education*

Ways to Work Together

- Nursing Working Group International Meetings
 - Face to Face meetings
 - SDO Transition NWG Meeting – May 23, 2007 Chicago
 - Conference Calls

- Collaborative Space

Ways to Work Together

- SNOMED CT Nursing Content Education Classes: April 18 (**pre-ACENDIO, Amsterdam**) and May 21-22 (**SNOMED Headquarters**)

SYSTEM ANNOUNCEMENT: To-do list performance improvements

Last night we pushed an update for to-do lists that should reduce page load times and improve general to-do list speed and performance — especially for people using IE 7, Firefox, and Safari. The improvement may not be as noticeable if you use IE 6. If you do use IE 6 you may want to consider upgrading to IE 7 or Firefox since IE 6 is no longer being developed. Many bugs in IE 6 are fixed in IE 7. We hope you enjoy the improved to-do list performance and thanks for your continued support.

Skin Assessment

Nursing Colleagues,

The Central Nursing Office (CNO) at The Department of Veterans Affairs has established the VA Nursing Outcomes Database (VANOD) project to track nursing sensitive indicators.

VANOD is implementing structured templates for skin assessment and re-assessment documentation within the VHA electronic health record. Nurses working in acute care settings across the system will complete these templates on patient admission, transfer and change of condition. Decision support tools will prompt reassessments based on time frames and total scoring using the Braden Scale.

We wish to identify relevant SNOMED CT concepts that match data elements we will use for tracking and reporting. We have some content that we have been unable to match to SNOMED CT and wish to collaborate with the SNOMED Nursing Workgroup.

We look forward to working together to accomplish the following goals:

1. Validate our match of data elements (aka Health Factors) to SNOMED CT concepts
2. Collaborating for expansion of SNOMED CT content

Diane Bedecarré RN-BC, MS

Nursing Informatics Site Liaison

VA Nursing Outcomes Database
